

Omnitracs Roadnet Telematics

Simplified Vehicle GPS Tracking

Omnitracs Roadnet Telematics provides clear, detailed oversight of how your vehicles and drivers are operating at any moment.

Right away, Omnitracs Roadnet Telematics has the potential to save you hundreds of dollars per vehicle every month by monitoring maintenance, engine idling, speed levels, safety issues, and much more.

Think about it. The two biggest investments you've made in your fleet, namely your drivers and your vehicles, are out on the open road right now — and out of sight. Yes, your drivers may call in at appointed times, but when it comes to knowing their up-to-the-second status and the health of their vehicles, you don't.

But now you do — with Omnitracs Roadnet Telematics. By deploying this advanced, full-spectrum solution throughout your fleet, you can monitor both driver behavior and vehicle diagnostics against the benchmarks that you select. Best of all, this actionable control and insight is yours in real time.

The result? Omnitracs Roadnet Telematics takes fleet management to new levels of compliance, risk reduction, cost effectiveness, and overall productivity.

With this affordable, no-hassle solution, you can:

- Reduce idling
- Optimize vehicle maintenance
- Assess driver behavior
- Monitor critical events
- Eliminate downtime
- Track mileage precisely

Lose the Risk — Not the Driver.

Replacing drivers is costly. That's why Omnitracs Roadnet Telematics gives you the driver-specific information and tools you need to empower your drivers to change behavior that puts them at risk.

Pinpoint Your Pain Points.

Omnitracs Roadnet Telematics lets you focus in on particular risks by driver, branch, region and more, so you can take action to address unsafe behavior and practices.

One Device — All the Answers.

Omnitracs Roadnet Telematics is a road-proven, GPS-based telematics solution that has helped commercial fleets realize significant savings in operating costs, ranging from insurance claims to roadside assistance. Omnitracs Roadnet Telematics provides a robust GPS-based, onboard monitoring technology that tracks a critical spectrum of vehicle operating and usage parameters, such as miles driven, engine faults, idling time, and much more. The result is a clear picture of your fleet's risk, productivity, and maintenance status — and a clear path toward improvement.

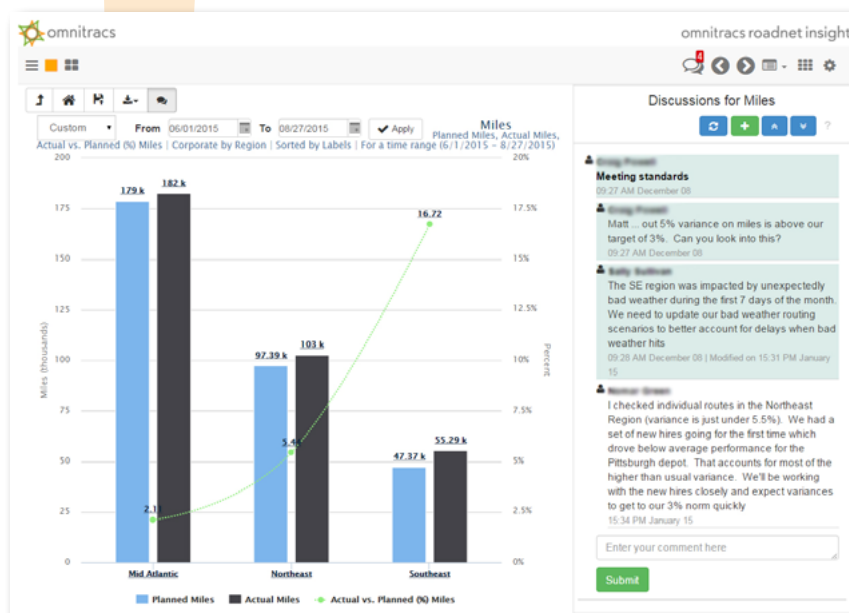

- Reduce fleet maintenance costs and optimize lease management
- Support “green” initiatives by controlling fuel consumption
- Reduce injuries, vehicle damage, and claims costs while helping drivers adopt safer habits
- Improve the productivity of your fleet, and your people

Reduce Fleet Maintenance Costs through Optimization and Prevention.

- Get the full value from your leases by tracking mileage more accurately than your odometer can
- Schedule preventive maintenance with greater accuracy through precise mileage readings
- Manage miles driven to preserve lease and warranty thresholds and slow wear and depreciation
- Optimize fleet size by identifying under-utilized assets
- Track and control speed to extend the life of gears, bearings, clutches, suspension and drive trains
- Find vehicle trends that drive costs up
- Fully integrated into routing and dispatching

Business Insight of Your Fleet.

Track top metrics, produce driver scorecards, and set up parameters to see which drivers need coaching. Download information and even start a discussion with other users. You can learn where improvement is needed by drilling down by region, worker, and other more.

Everything from training, hardware, data airtime, and 24/7 customer support are included.

Support Smarter Operations.

Want to drive down costs at the pump? Omnitracs Roadnet Telematics can help you eliminate unnecessary miles driven, reduce engine idling, and promote efficient driving practices — all to reduce fuel consumption.

Monitor Risk and Promote Safety.

Omnitracs Roadnet Telematics gives you powerful tools not only for monitoring risky driving behavior, but also for helping drivers eliminate it. Controlling speed and limiting after-hours use — these are small changes that can mean huge savings for your business in avoiding injuries, vehicle damage and insurance claims.

See the big picture: Omnitracs Roadnet Telematics lets you monitor a full spectrum of risk factors, including speed, harsh braking and rapid acceleration, idle time, stops per day, and after-hours use.

Get More from Your Fleet.

By measuring the way time is spent throughout your fleet every day, you will better understand the quality of your time investment. Monitoring deviations in time and distance will help you initiate strategies for improved profitability and productivity through a greater understanding of how your customers are being served.

In addition, reducing speed and other factors that contribute to wear and tear, and more, can help you optimize your preventive maintenance schedule and eliminate unplanned downtime. Thanks to Omnitracs Roadnet Telematics, costs associated with out-of-service vehicles can be reduced by up to 25%.

The Power of the Platform.

When combined with Omnitracs Roadnet Anywhere routing and dispatching, you'll get even more data in a single place. Compare the actual route to the plan and know if you're behind or ahead of schedule — and make changes on the fly.

"I share Roadnet Telematics information across our company, from sales reps to the president of the company. It gives each of them data that they can use in day to day decision making."

— Frank Spicher, Director of Transportation
Elias Wilf

Getting More from Your Technology Investment

We offer Omnitracs Professional Services to all sizes of fleets to help you utilize our applications and our partners' applications in the most efficient way. Our assessment, integration, custom development and programming, training, business intelligence, and predictive modeling services deliver practical solutions. This critical information increases your productivity and efficiency, so you can both grow and differentiate your business.

About Omnitracs, LLC

Omnitracs, LLC is a global pioneer of fleet management, routing and predictive analytics solutions for private and for-hire fleets. Omnitracs' nearly 1,000 employees deliver software-as-a-service-based solutions to help more than 50,000 private and for-hire fleet customers manage nearly 1,500,000 mobile assets in more than 70 countries. The company pioneered the use of commercial vehicle telematics over 25 years ago and serves today as a powerhouse of innovative, intuitive technologies. Omnitracs transforms the transportation industry through technology and insight, featuring best-in-class solutions for compliance, safety and security, productivity, telematics and tracking, transportation management (TMS), planning and delivery, data and analytics, and professional services.

Learn how you can use our applications, platforms, and services to reduce costs, increase profitability, and stay competitive. Visit www.omnitracs.com and let us show you how you can save time and money.
